**DATA PROCESSING**
Schema Matching and Generating NL queries from CSV data

**QUERY GENERATION**
Use Finetuned model for response generation

**QUERIES GENERATION**
T5-Pretrained model is used for SQL query generation

**FINE TUNNING GPT3**
Used Data to fine tuned the GPT-3 on 950 Sample

**CLEANING DATA**
Cleaning dataset and adding synthetic data to increase number of samples

**DATA ANALYSIS**
350 examples related to custom csv file and 700 complex queries from WikiSQL

Proposed NL2SQL model

Upon each question asked, example will be added to Dataset
